Good Morning John...

Have any stats / observations been collected re Melrose? Is there any info that Sanitation has to share? Please let us know.

Sorry for not getting back right away. I got your VM too. Yes, the Bureau of Sanitation is studying the cleanliness of streets. I think it would be great, like you mentioned Don, if we met with the bureau. I met with them recently and I think it would be great if they came and presented at a board meeting. Thoughts?

Hello John...

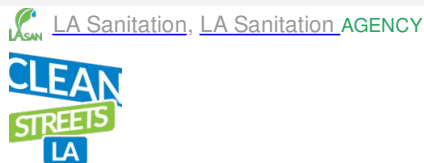

I had heard that the City was scoring the cleanliness of its streets and alleys. I don't know the status of that work. Then Isack contacted me and asked about it. Can you tell us? Thanks.

Hi there,

Have you seen this? Looks like the city is scoring all streets and alleys.

As part of Mayor Eric Garcetti's Clean Streets initiative, LA Sanitation drove all of LA's public streets and alleys (traveling over 22,000 miles!) and gave each block a "cleanliness score". 1 is clean, 2 is somewhat clean, and 3 is not clean.

This data has been aggregated into operational grids which helps LA Sanitation strategically deploy resources, such as a new dedicated Clean Streets clean-up crew. The map shows the average score within each grid. Red grids contain a lot of dirty streets while green grids contain mostly clean...[Read more](#)
